

Aptus delivers decades of experience in design and manufacturing, including developing products for the standby power and battery industry. We are committed to providing products of the highest quality, proven through independent testing and certification groups, as well as unparalleled customer service.

Fabrication

All rack frames are fully welded and coated with acid resistant epoxy to ensure longevity in standby battery applications. Custom racks are available.

Integration

All racks offer optional spill containment integration. This optional rack series integrates environmental UL Listed spill containment using new, patent pending designs. Inter tier tray containment is also available.

Logistics

High production capacity enables Aptus to ship most common rack configurations in only a few weeks, providing on-time delivery that matches manufacturers' quick ship programs. Stocking programs are available.

Heavy Seismic Battery Rack Solutions

Seismic Qualifications:

- IBC 2012 Certified
- IBC 2009 Certified
- IEEE 693 Compliant
- Conforms to UBC Standards

Light Seismic Battery Rack Solutions

Seismic Qualifications:

- IBC 2006, 2009, 2012 Certified
- IEEE 693 Compliant
- Conforms to UBC Standards
- Seismically tested, certified and overseen by our team of California Structural & Professional Engineers

Non-Seismic Battery Rack Solutions

Configurations Available:

- 2 Tier 1 Row
- 1 Tier 2 Step
- 1 Tier 1 Row
- 2 Tier 2 Step
- Custom Configurations

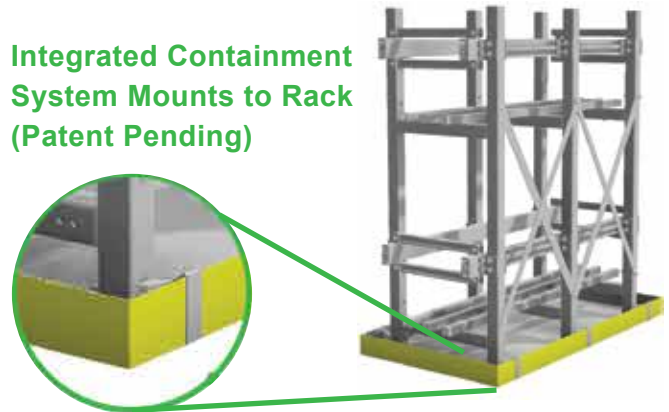

Lengths available from 2 to 20 feet.
 Delivery in only 2-3 weeks on common configurations. Splice kits are available for larger sizes.

Integrated Compliance Solutions

- UL Listed Spill Containment System Bolts to Rack
- No Floor Anchoring Required
- FM Approved Neutralization and Absorption Pillows Available
- Reduced Installation Costs
- New Patent-Pending Feature

Integrated Containment System Mounts to Rack (Patent Pending)
