

# Neutralizing & Absorbing Pillows

We offer Flame Retardant (FR) & UL Recognized pillow products for use with our EnviroGuard Spill Containment Systems. Standard Pillows are UL Recognized as a component of a UL Listed system. Flame Retardant Pillows are dual certified with UL Recognized as part of a containment system and FM Approved pillow certification is available, ensuring the highest level of compliance. Our pillows are pH reactive with a color indicator that changes upon contact with battery electrolyte. They also feature a new dustless Neutrasorb™ compound (patent pending) that helps reduce airborne particulates, helping facilities stay compliant with ISO 14644-1 and ASHRAE TC 9.9 for cleanliness.

## Features

- Electrolyte neutralizing material for use with any standby and motive power application.
- Protects equipment and reduces the spread of leaking battery electrolyte.
- pH Reactive visual spill indicator to identify if pillows have been exposed to electrolyte (no false compound)
- New and improved dustless Neutrasorb™ technology for facility cleanliness
- Proprietary Neutrasorb™ compound that solidifies after a spill, reducing free liquid for easier cleanup.
- Improved fabric strength, resistant to degradation over time.
- Tags on the pillows are stamped with the manufacturing date and serial number for traceability and quality assurance.
- Eligible for the EnviroGuard Recycling Program (subject to approval)
- Designed and manufactured in the USA

## Technical Specifications

- NABPILL-FR Pillows neutralize sulfuric acid electrolyte used in lead-acid batteries and has an FM Approvals certification.
- NABPILL-K pillows neutralize potassium hydroxide (KOH) electrolyte used in Ni-Cad batteries.
- Dustless Neutrasorb™ compound
- Dimensions: 12" x 12"
- Weight: 3 lb

## Certifications & Standards

- UL 2436 and UL Recognized (as part of a spill containment system)
- FM 4955
- IEEE 1578

## Warranty

- Limited 10-Year Warranty
