

Welcome to the EnviroGuard's Digest- October 2025

Welcome to this month’s edition of the EnviroGuard Digest, your source for the latest company updates, product innovations, and industry insights shaping the future of energy storage safety and compliance.

NERC Training Courses – Now Available in LMS

Instructor Tom Carpenter leads three specialized NERC compliance courses now available in our Learning Management System. Build your team’s expertise in power system reliability and compliance—enroll today! [Click Here](#)

2026 EnviroGuard Calendar: Order Yours Today!

The NEW annual Calendar is now available!

Stay organized while showcasing your commitment to innovation and safety in battery applications!

****Order your 2026 calendar [here!](#)****

Quantities are limited—place your order soon!

Take a Virtual Tour of the EnviroGuard Facility

We’re opening our doors virtually!

Explore our facility and see how our products are designed, tested, and manufactured to the highest standards.

Watch the tour video directly from our homepage and discover the people and processes behind EnviroGuard’s industry-leading solutions. [Click Here.](#)

Understanding UL 2436: The New Standard for Spill Containment

The industry standard has evolved—UL XMB has been replaced with UL 2436, officially titled the “Outline of Investigation for Spill Containment for Stationary Acid and Alkaline Electrolyte Battery Systems.”

This update broadens safety coverage to include alkaline electrolyte batteries (like Ni-Cad) in addition to lead-acid batteries, ensuring comprehensive protection across all stationary energy storage applications.

EnviroGuard's spill control systems are designed to meet and exceed these updated requirements, providing reliable containment for every installation. [Click Here.](#)

[Arc Flash & Electrical Safety Podcast](#)

We're proud to sponsor the Webinar focused on arc flash hazard calculations and IEEE 1584 standards. Listen to the episode here: [The Specification of Arc Flash Hazard Calculations](#)

[Hydrogen & Ventilation](#)

Hydrogen sensors have become easier than ever with no maintenance or calibration. Visit our website to learn more about long-lasting sensors that last the life of most battery systems that are self-calibrating and require no-replacement parts over the life of the sensor. [Click Here.](#)

Congratulations to Jack Marte for 15 Years of Service!

Congratulations are certainly in order for Jack Marte on reaching his 15-year service milestone at EnviroGuard! Jack, widely known by many long-time EnviroGuard customers, has built a strong reputation as the company's go-to professional, particularly as the Customer Service Manager-Trainer. His longevity is a testament to his dedication and expertise in bridging the gap between customers and EnviroGuard's product knowledge, making him an indispensable and familiar face for ensuring customer satisfaction.

Integrated Rack Technology: Now Compatible with All Battery Racks

EnviroGuard's Integrated Rack Technology is now available for all makes and models of battery racks. Our new universal clamp system enhances flexibility and simplifies installation ensuring your rack systems are ready for any battery configuration.

Lunch & Learn Series – Now Enrolling for 2025

We've completed new construction engineering and design modules for 2025! Sign up for a Lunch & Learn session to discover the latest innovations in spill containment, battery room design, and regulatory compliance.

Includes:

- Lunch
 - Live Q&A
 - Training Materials
- [Click here to register](#)
-

Industry Events & Thought Leadership

Upcoming Highlights:

IEEE / ESSAT Meeting – [Click here for details](#)

December 4th: 2025 7x24 Metro New York Annual Holiday Party [Click here for details](#)

December 7th: EnviroGuard Holiday Party

Feature Sessions:

The New Standards Driving Standby Power Design in 2025 – Updates from IEC, IEEE, and NFPA

Safety & Thermal Runaway Protection in Stationary Systems – Understanding NFPA 855 & UL 9540A

Hydrogen Ventilation & Monitoring in Small Enclosures – Best practices for telecom battery systems

Future Tech Spotlight – Exploring solid-state batteries, fuel cells, and hybrid energy storage innovations

We're Here for You: Chat & Text Support

Questions or quick updates? Our support team is available via chat or text from 5 AM – 2 PM PST.

We're always ready to help you get the information you need.
